

2022 POST SHOW REPORT

16 & 17 March 2022

Porte de Versailles, Pavillon 6

www.autonomy.paris

HEADLINE PARTNERS

The World's Leading Sustainable Mobility Network

The first edition of our trade show Autonomy Paris took place in 2016, a year after the historic Paris Climate Agreement. Our name 'Autonomy' is a reminder that city mobility should function independently of fossil fuels.

Autonomy Paris is the world's largest annual gathering of international policy makers, institutions, NGOs, corporations, companies and start-ups focused on sustainable urban mobility solutions.

AUTONOMY PARIS 2022 combines exhibitions stands, 2 conferences program

Duration
2 days

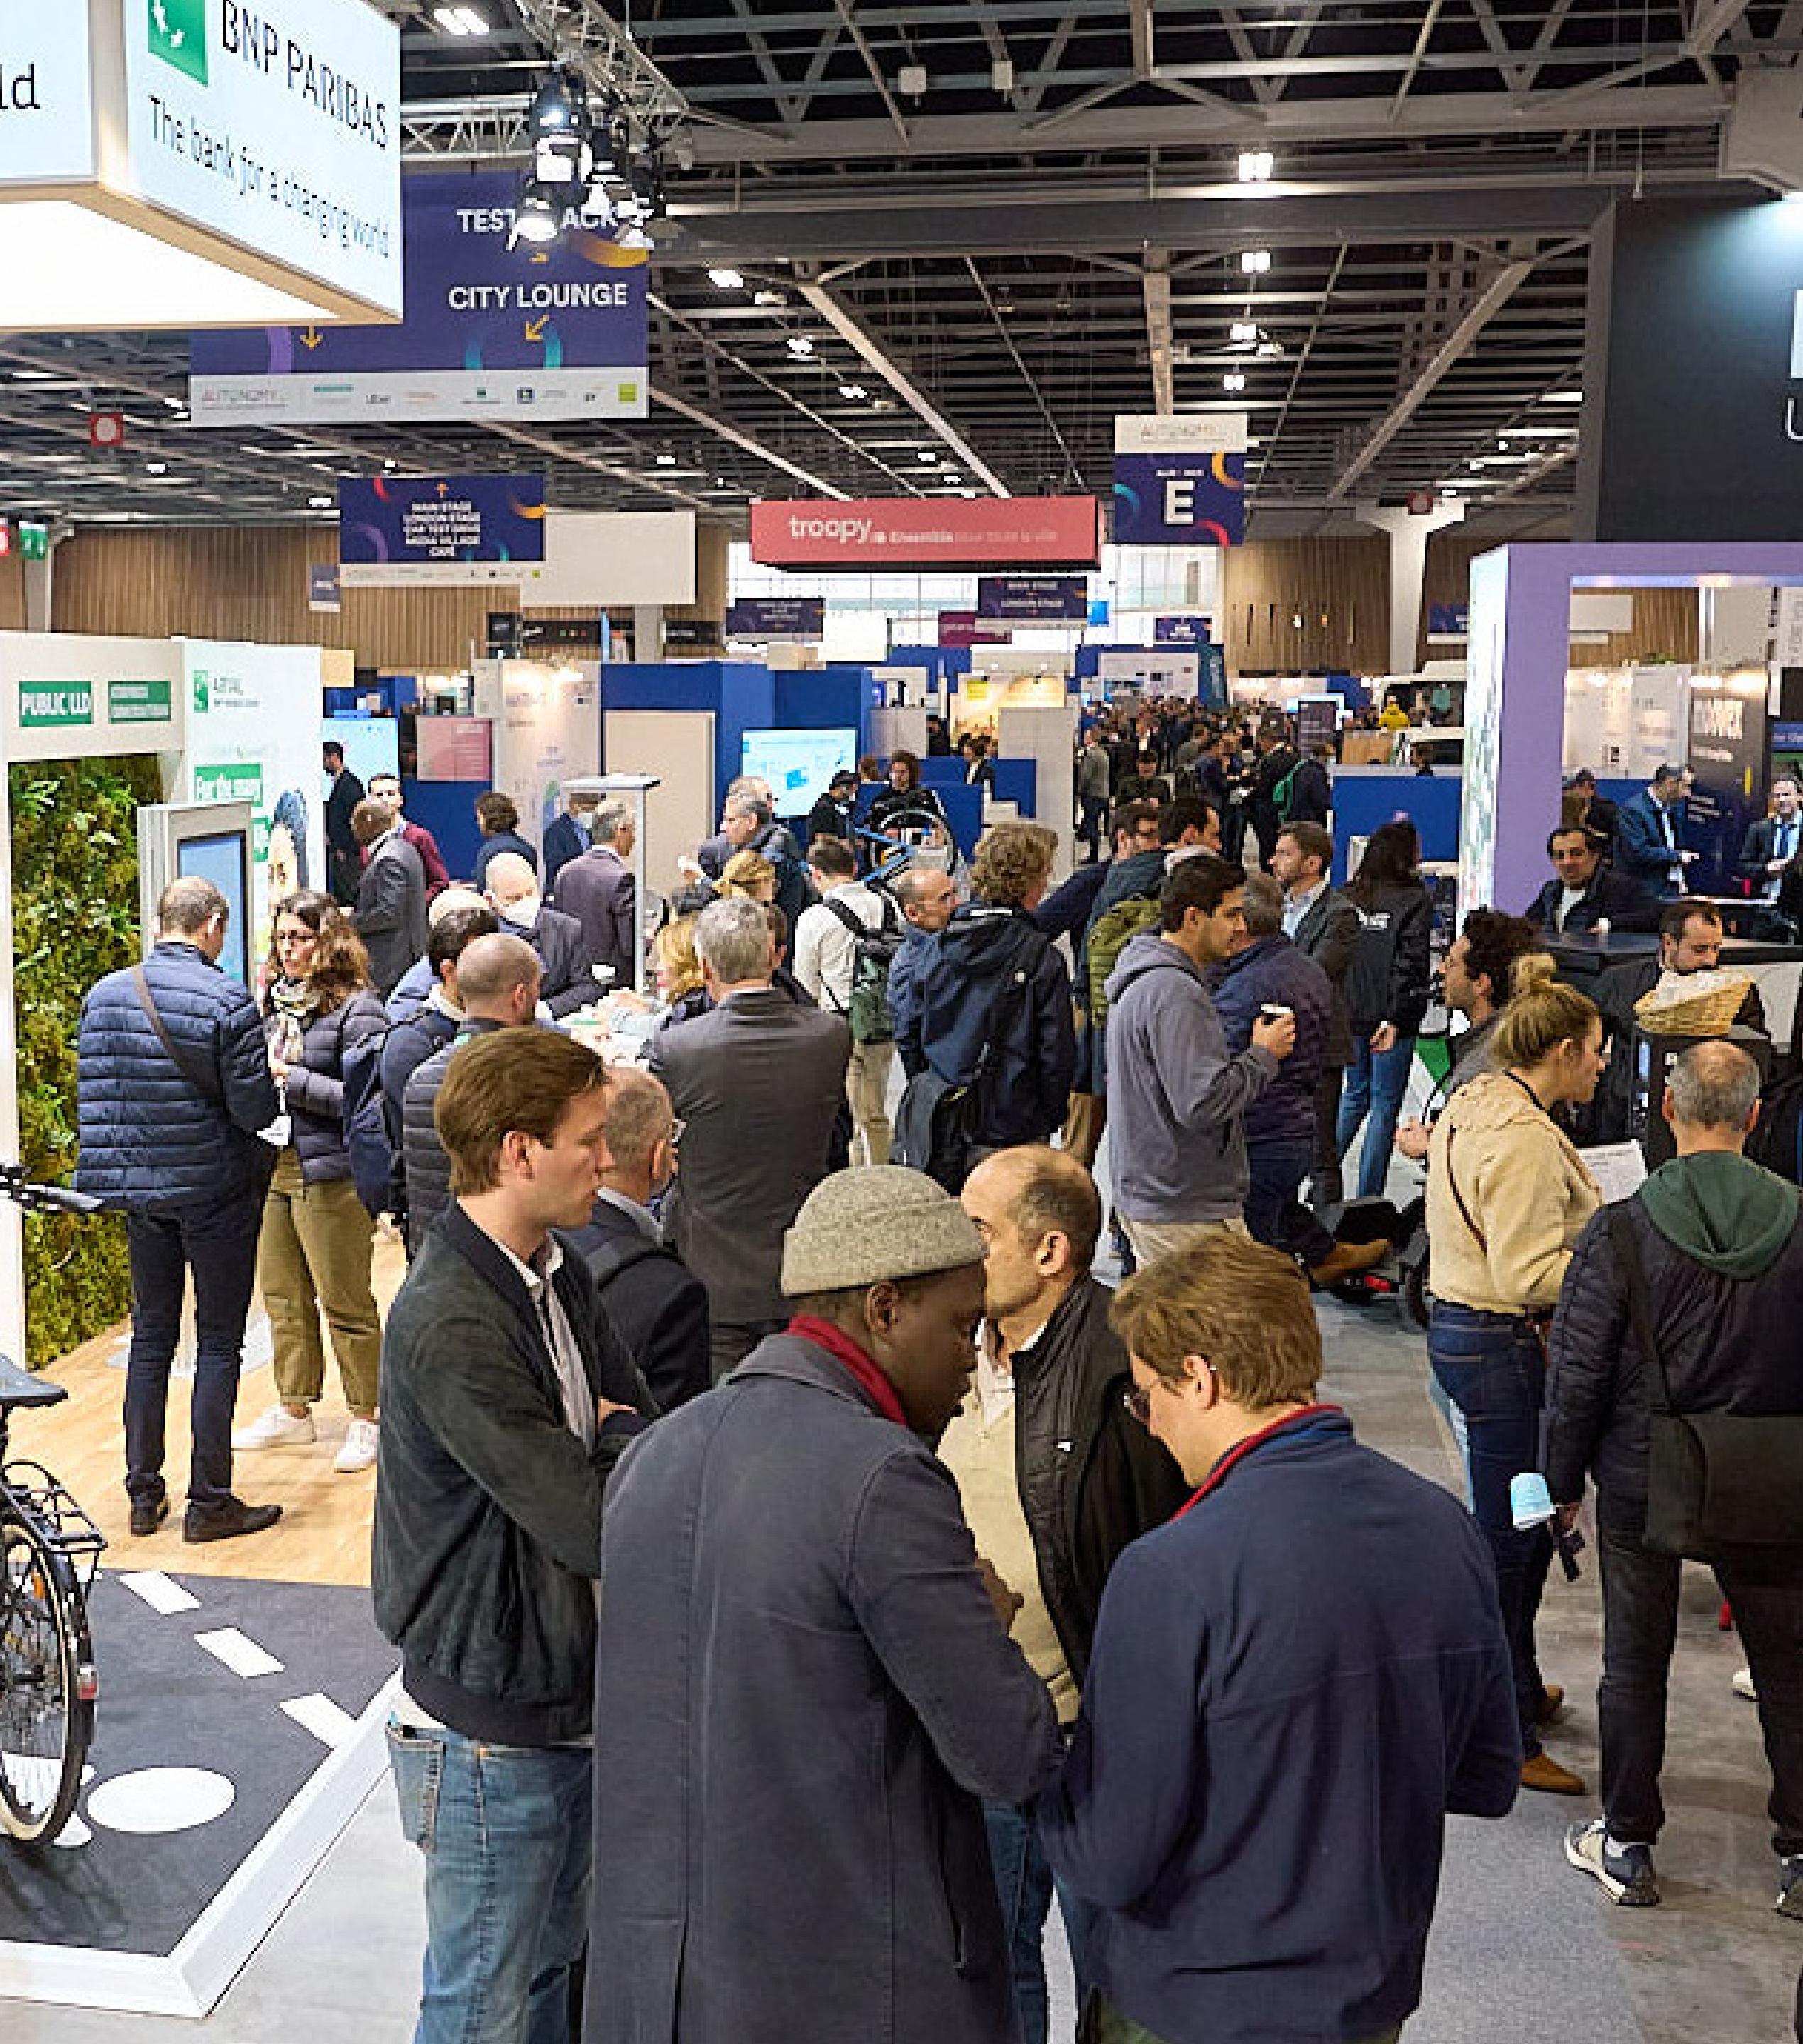

Venue
Portes de Versailles,
Pavillon 6

- Get Our Cities Moving and Industry Talks, test tracks and products demonstration and a business meetings programme connecting buyers with exhibitors to facilitate successful trade.

Our conference program hosted 300+ speakers across 8 Industry Themes. In addition, we partnered once again with Polis Network to bring to Autonomy Paris the acclaimed "Get Our Cities Moving" conference where global and European leading cities talk about their mobility plans.

Exhibitors Quotes

“

Autonomy is arguably the largest mobility conference that we have at the moment thanks to Ross Douglas, the CEO. They started 6-7 years ago: it's impressive how it developed. For us it's important that different stakeholders come together here and talk about the future of mobility.

Patrick Ayad

Partner & Global Head of Automotive and Mobility

“

Autonomy Paris is very important for BNP Paribas because it brings together a lot of the key actors in the ecosystem that are here to enable sustainable mobility tomorrow.

Joachim Reinboth

Co-head of Automotive and Mobility

“

Together with a community of interest at Autonomy, we are working on a shared autonomous shuttle in rural and peri-urban areas.

Nicolas Marescaux

Directeur adjoint Réponses
Besoins Sociétaires et Innovation

“

At Autonomy, we are able to see all current and new trends of the market in terms of mobility.

Gaetano Sciacovelli,

VAIMOO Sales & Business

“

Autonomy is a great annual event to meet with the entire mobility sector, discover the latest innovations and collectively imagine the solutions for a smarter and greener mobility in cities.

Louise Pasin,

Communications Lead Uber

“

Autonomy fair is an important moment for Troopy, to partner with the most responsible companies, to become one of the major actors of the mobility ecosystem.

François Hoehlinger

Directeur général

“

The fair is good and relevant for us. Well organized and always very good PR. Congratulations to all of you.

“

The show is very well organised.

“

Location is great ! The staff are very nice and super helpful.

“

It was a nice experience, I thank you for your professionalism and your kindness.

Anonymous Feedback from the Exhibitors Survey conducted in March-April 2022

Top Political Engagement

Autonomy Paris has become a key gathering point for decision-makers and political leaders from cities all around the world. In 2022, 50 countries and 56 cities participated at the event, as did 30 institutional partners; and 250 institutional representatives.

David Belliard, Deputy Mayor of Paris for Mobility, and Stéphane Beaudet, Vice-President of the Île-deFrance Region, presented the opening speeches on both days, articulating a bold vision for sustainable mobility.

6 Official Delegations

Six delegations were welcomed at Autonomy Paris 2022 and shown around during a walking “delegation visit”.

The delegation of Noord-Holland was this year’s biggest delegation with 19 representatives participating in the guided tour.

The delegation of Baden-Württemberg attended the delegation visit virtually due to Covid measures.

Two high-level politicians, Deputy Mayor of Paris for Mobility, David Belliard, and Vice-President of Ile-de-France Region, Stéphane Beaudet, also brought delegations.

Delegations

1. Region of Noord-Holland
2. Ministry of Ireland
3. Ministry of Transport of Baden-Württemberg
4. Delegation visit of David Belliard, Deputy Mayor of Paris for Mobility
5. Ministry of Transport and Communication of Lithuania
6. Delegation visit of Stéphane Beaudet, Vice-President of the Ile-de-France Region

“ AUTONOMY 2022 inspired the delegation of Baden-Württemberg on how to further pursue the regional government’s ambitious goal of reaching climate neutrality by 2040. Regions play a key role in effective climate protection as they have legislative, financial and administrative levers with respective effects on a greater scale.

Delegation of Baden-Württemberg

Get Our Cities Moving

For the third year in a row, POLIS Network and Autonomy joined forces to present the 'GET OUR CITIES MOVING' program at Autonomy Paris.

Hosted at the event's main stage on both mornings, the initiative provides a series of conferences to help cities and local governments share their most innovative projects and seek solutions tailored towards their current and future mobility needs.

Paris City Summit

The Autonomy Paris City Summit, which was organized in partnership with POLIS Network and the City of Paris, hosted a high-level event for Mobility Deputy mayors at the [Hôtel de Lauzun](#) on Île SaintLouis in the historical heart of Paris.

25 deputy mayors, regional ministers and secretaries of state for mobility discussed their perspectives on greener and more inclusive forms of urban mobility. The conversation ranged across topics linked to ways of reducing greenhouse gas emissions from the mobility sector, road safety concerns and how to wean away from predominant existing fuel sources.

After the political discussions amongst the different city officials, an incredible bike ride was planned by the City of Paris and the Syndicat Autolib' et Vélib' Métropole, which provided Vélib-bikes for all participants.

“

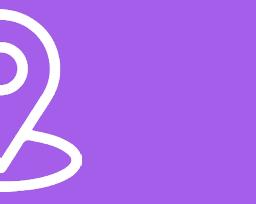

It is up to us, metropolises, regions, cities, and territories, to continue and intensify our efforts to transform and decarbonise mobility.

David Belliard
Deputy Mayor of Paris on Public Space, Transport and Mobility

Workshops

Beyond our conference program, Autonomy and its Institutional Partners have also prepared side workshops and activities to enhance the experience of participants at Autonomy Paris 2022.

Workshop 1: “Fresque De La Mobilité” By The Shifters

“Fresque de la Mobilité” is a collaborative team workshop to raise awareness of the carbon challenges of personal mobility.

Workshop 2: The European Shared Mobility Accelerator By Mpact

A dialogue between cities and shared mobility associations to get more understanding about the opportunities and challenges for an urban shared mobility plan, hosted by Mpact (Angelo Meuleman) and “Association des Acteurs de l’Autopartage” (Nicolas Frasier).

Workshop 3 : MaaS Project : Toward A European Strategy / Collaboration By FABMOB

A two hour workshop on experiences of standardization in a MaaS project : toward a European strategy / Collaboration ?

Workshop 4 : Workshop By Paris City Hall

Paris City Hall will detail their latest and most successful projects: The Traffic-Controlled Zone, Beautify Your Neighborhood Program, Streets to Schools and Bike Plan

Quotes of Partners

“

ICLEI is proud to be a long-standing institutional partner of AUTONOMY. It is astounding to see how this platform has grown to attract more and more new sustainable mobility solutions and become the place to be for cities to exchange with innovators.

Tu My Tran
Head of Sustainable Mobility, ICLEI World Secretariat

“

I am delighted to have been able to open this new edition of Autonomy Paris, once again in person, which is clearly always a success! The figures speak for themselves: 6,000 visitors, 92 countries and 150 cities were represented. It is an important show, as it brings together all the players in the field of mobility, in particular micro-mobility, whose development has only strengthened in recent years, even more so in the context of the health crisis, which has led to an increase in their use. Autonomy allows us to take the time to meet, to exchange, to share our problems and to confront our mobility needs with the new solutions proposed. It is a space that is necessary, in particular for local authorities, to enable them to follow and become familiar with the latest trends and innovative solutions in mobility - and we need it! - by going to meet directly with the professionals present, as I was able to experience myself on site!

Stéphane Beaudet

Vice-président en charge des transports Région Île-de-France,
Conseil d'Administration d'Île-de-France Mobilités

“

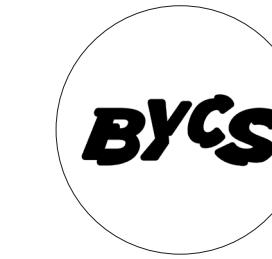

The experience and the possibility of connecting with so many people with the same objectives was thrilling. In particular, the experience of the Paris City Summit, the bike ride and the walking tour around all the projects, was super productive for us. We have learned a lot from Paris' experiences and came back to Buenos Aires completely recharged and convinced that we are going in the right direction.”

Dino Buzzi
Director of Planning, Use and Evaluation, City of Buenos Aires

“

Autonomy has become “incontournable” and we're already looking forward to next year's event.

Areas of Interest of Visitors

Visitors Data

Role in the company

“

I am interested in shared mobility and MaaS, because these are the 2 biggest challenges mobility will face on its way to decarbonization and flow optimization.

“

I found all of these themes interesting because at the show, it is possible to go from concept to reality.

Level Of Responsibility

“

It would be interesting to discuss further the place of communities and the state in the design and deployment of mobility policies.

“

Why not create a permanent stand for cities.

Media Quotes

“

For the second year in a row, Rhapsody Magazine had the pleasure to be media partner at Autonomy Paris event. The participants and the topics were at the highest level, and we congratulate the organizers for the professional planning, and the good job they do to promote sustainability. We look forward to our continued partnership.

Rhapsody Magazine

“

Very good organization and many interesting contacts. A fair that, after finishing, gives you a lot of work... and that's very good. It's because there have been good and many contacts.

MZE

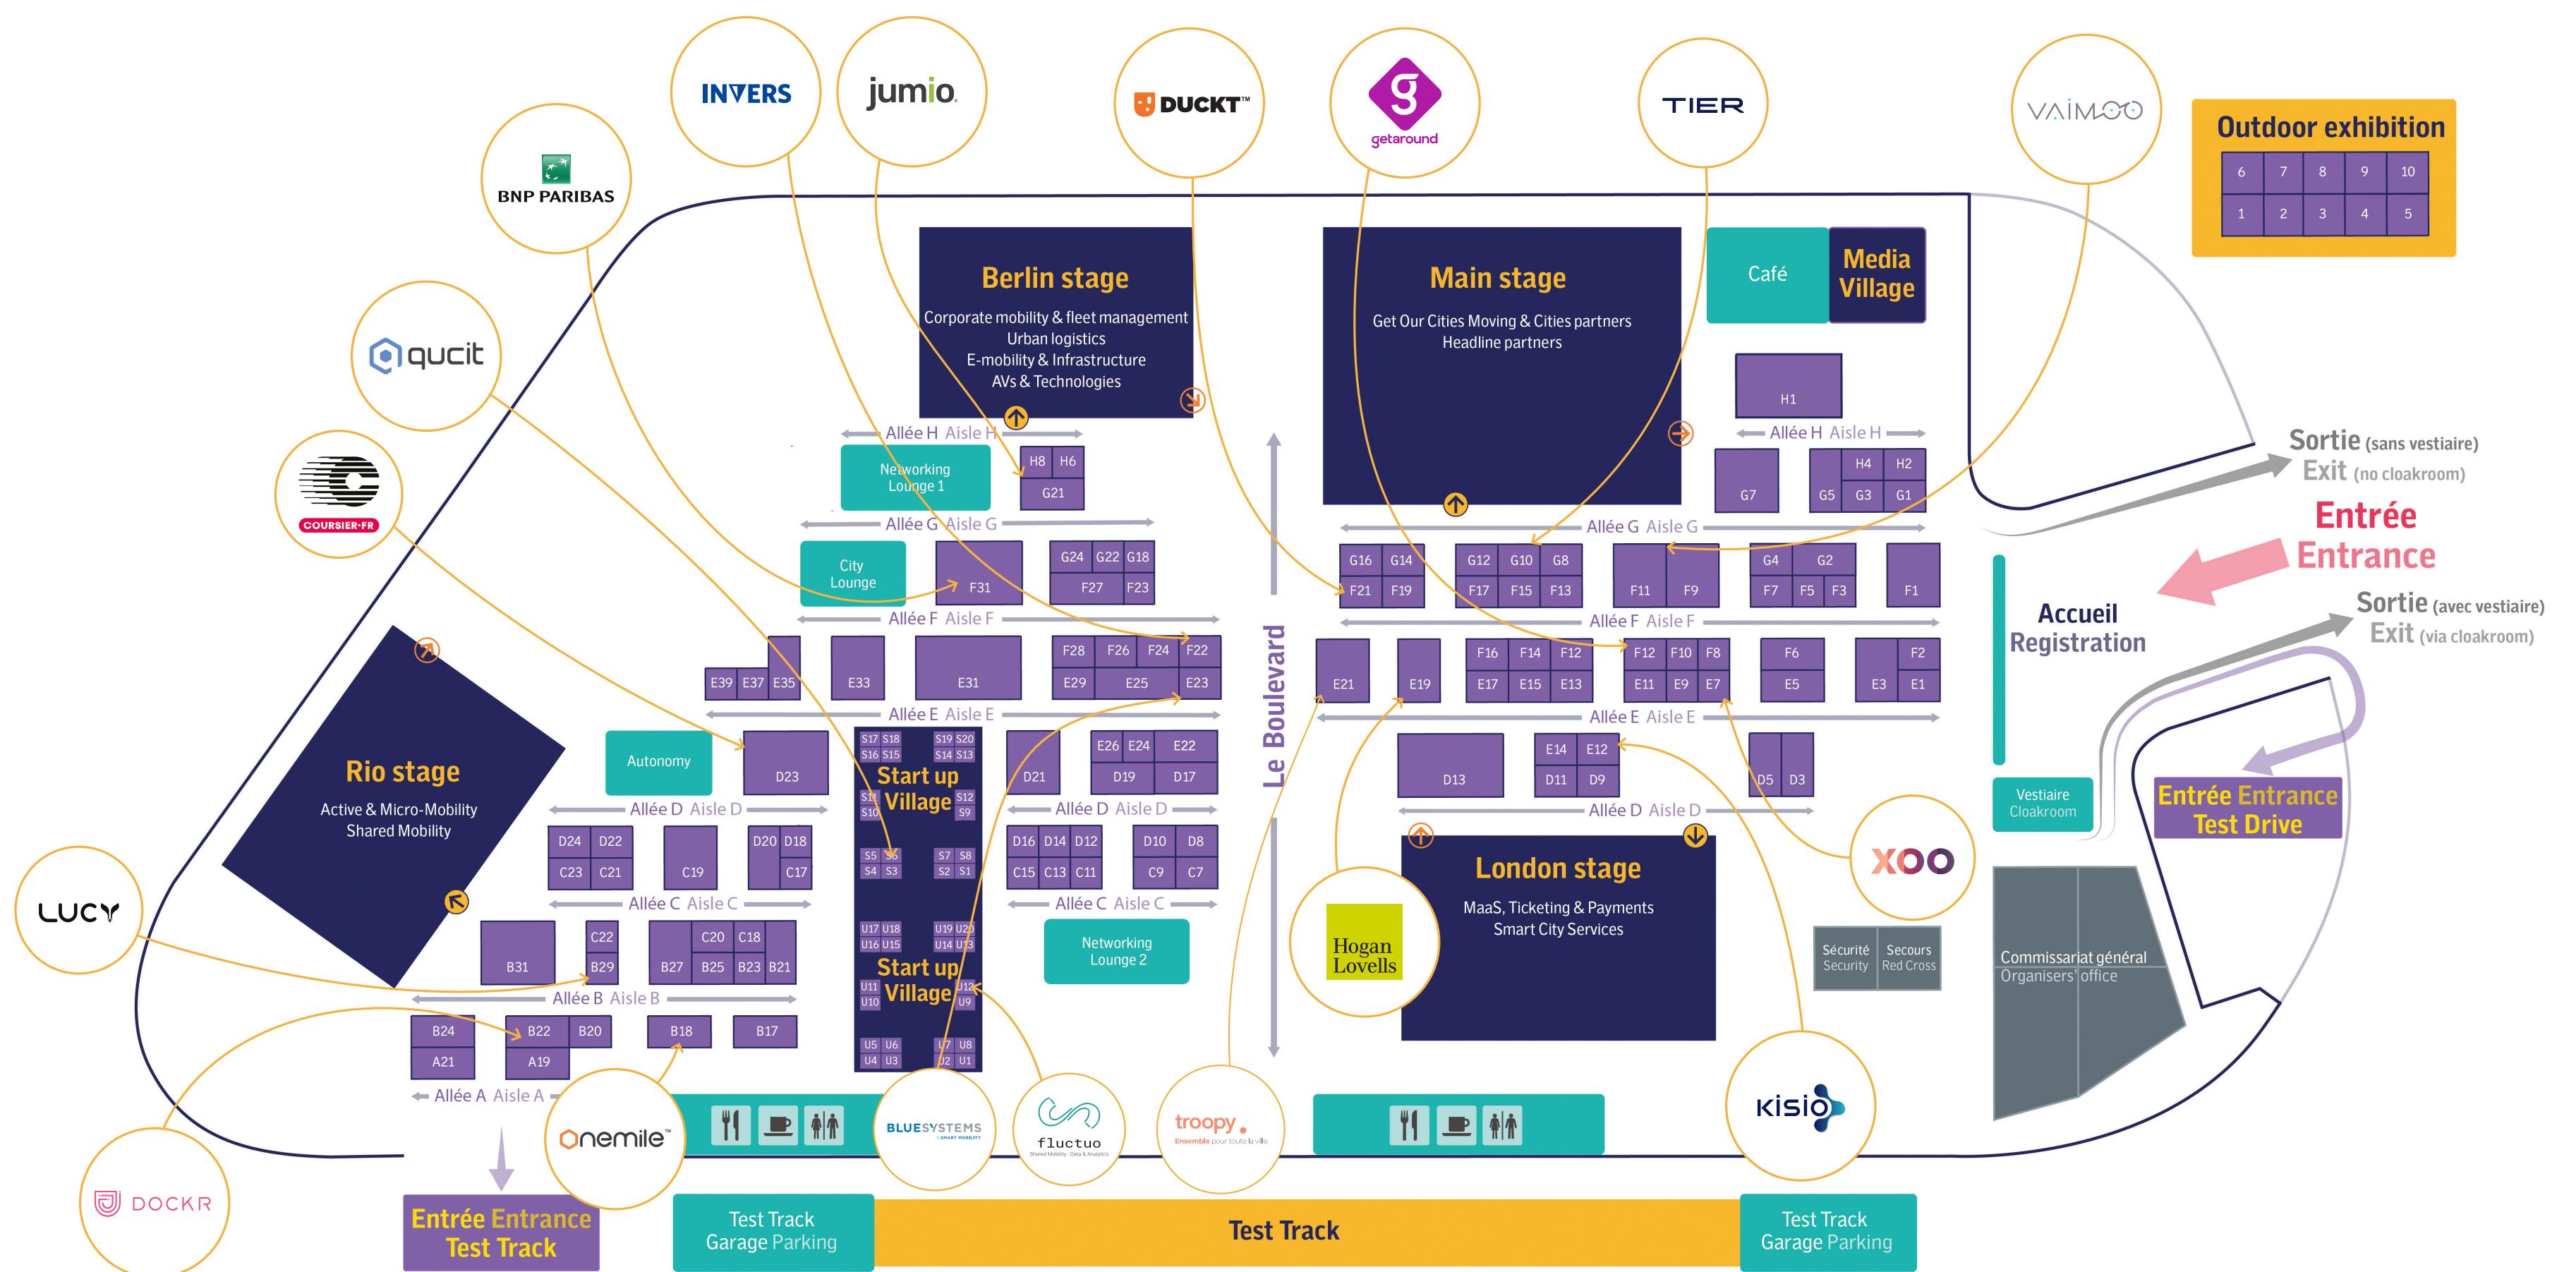

“

News Tank Mobilités appreciates the Autonomy show for its ability to bring together the French and international decision-makers in urban mobility that we wish to meet. The warm atmosphere is conducive for easy and constructive exchanges.
