

## Attendance was up 20% for the 6th edition of Autonomy Paris, the global sustainable mobility fair

*Paris, March 22, 2022*

The 6th edition of Autonomy Paris was a huge success! After two years of digital events, participants could finally gather in person to discuss the future of mobility.

Several mobility solutions were showcased during the event: **new electric mopeds** (Troopy, Oxygo...), **electric scooters** (Plume, Lucy), **electric vehicles** (Marcel, Kia...), **electric bikes** (Lime, Cake, Fifteen...), **last mile delivery and cargo bikes** (Coursier.fr, Urban Arrow...), **electric trucks** (Volta Trucks, StreetScooter), **new services and systems of navigation** (Getaround, Kirrk...), as well as **accessories for new mobility service users** (Cosmo Connected, Autoliv...).

Over the two days, the trade show hosted **200 exhibitors, 6,000 attendees, 200 journalists, 300 speakers** and displayed more than **80 vehicles** for a test drive. This year's show was, on aggregate, **20% bigger than the last physical event in 2019**. At least **600 planned business meetings** took place at the show.

It was an honour to have Mr. **Stéphane Beudet** (Vice President of the Île-de-France Region) and Mr. **David Belliard** (Deputy Mayor of Paris) present the opening speeches for each day of the event.

The programme **Get Our Cities Moving** was co-organised with POLIS, the leading network of European cities. The **Industry Talks** attracted a high level of interest from visitors and participants. In all, the show had 30 institutional partners (represented by 250 people from governments and institutions) and 11 city partners (including Madrid, Roma, Brussels, Rio and Buenos Aires). In total, 56 cities from across the world had some form of representation at the show. And 6 official delegations were in attendance.

More than **50 countries** were represented at the event. The top 15 most-represented visitor countries were: Germany, United Kingdom, Netherlands, Belgium, Spain, Switzerland, Italy, United States, Turkey, Poland, Israel, Brazil, Ireland, Luxembourg and Sweden. 65% of the visitors were French and 35% were from the other 50 nationalities in attendance.

In 2023, the goal for Autonomy Paris is 50% international and 50% French attendance, which is the percentage split we had before the health crisis. Autonomy looks forward to welcoming back American and Asian participants in 2023 and in growing Autonomy Paris across the eight sectoral themes. The show is also excited about upping the number of city partners from across Europe and Latin America.

Let's meet again in a year, **22 & 23 March, 2023**, at the Porte de Versailles, Pavilion 6 in Paris.
